

**2025 ASCE Gulf Coast Student Symposium at Mississippi State University  
Richard A. Rula School of Civil and Environmental Engineering  
March Madness Free Throw Competition  
March 6-8, 2025**

**Overview:**

School teams will try to make free throw attempts versus opposing school teams.

**Team Members**

The maximum number of students allowed on each team is 4.

**Notice of Intent**

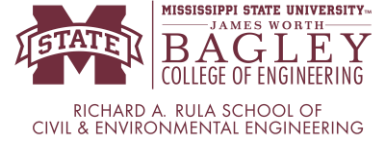

The team captain must state their Notice of Intent to participate in this competition at the symposium registration desk on March 6, 2025 and provide (1) the name and email address of the team captain; and (2) the names of the team members. Failure to satisfy this requirement may result in disqualification from a student chapter participating in this competition and this is at the discretion of the Head Judge.

**Requirements**

The team captain and at least one team member should be present just before the tournament begins. If a team is scheduled to play during a round but is not available for 10 minutes, then that team automatically loses the round.

**Specifications**

The maximum number of team participants per round is 2. For each round, a maximum of 1 member from each team that identifies with pronouns he/him/his can participate. For each round, each of the 2 team members attempt 10 free throws (i.e., 20 free throws per round). Teams with only one member can play during a round but are only allowed 10 total free throws during the round. The team with the highest number of free throws made out of the 20 attempts advances to the next round. Tie-breakers are decided via shoot off with rotating team members. For example, if Team Member 1A makes the free throw and Team Member 2A misses the free throw, then Team 1 advances to the next round.

### **Points**

The competition will be conducted in a double-elimination bracket tournament style.
