Faculty Concrete Cornhole Competition Rules

Objective:

The objective of the Faculty Concrete Cornhole Competition is to use the concrete cornhole board created by your university and compete against faculty advisors from other universities to determine who is the best of the best. Each university's constructed board will be used during the competition.

Competition Overview:

- Each faculty advisor will use the school's provided bags to play,
- Can have 1 to 2 faculty players.
    - If no faculty member is present, a graduate student who is filling in as an advisor may also compete.

Supplies Needed:

- Your university's cornhole board
- 8 standardized cornhole bags (2 sets of 4 with different colors)

Judging:

Will be based on performance in the tournament only. If your university's board has failed before the faculty competition, it will not be eligible to play

Questions:

Faculty Concrete Cornhole Competition Rules

Tournament Play

Gameplay

- The boards shall be placed 27 feet apart, with the front edge of the board as marked on the ground.
- One player from each team will stand at each of the two boards. Each team will use their own four bags of one color.
- All bags begin on one board
- Players alternate pitching cornhole bags toward the opposite board from behind the front of their board. Players pitch their bags in an underhand motion.
- After each team has pitched four bags, players take score and resume pitching towards the opposite board.
- The team scoring points in the previous round goes first in the next. If it were tied, the team that went first in the last round would get to go first again.

Scoring:

- A cornhole bag that goes through the hole is worth 3 points.
- A cornhole bag that lands on the board and stays there is worth 1 point.
- A cornhole bag that lands on the ground or bounces onto the board is worth 0 points and shall be removed before the next toss.
- Points Calculation for one round: The team with the higher score in a round earns the difference in points. For instance, if Team A scores 5 points and Team B scores 2 points in a round, Team A earns 3 points for that round.
- During round-robin play, each game will be played to 11 points. If the score is tied at the end of a round, the game continues until one team scores. There will be no "drop back" scoring during round-robin play (i.e., if your score exceeds 11, you will NOT drop back down to a set point value).
- The semi-final and final rounds in the winners' bracket will be played to 15 points. During these rounds, "drop back" scoring will be used; if a team exceeds 15 points during a round of play, their score will drop back to 10 points. In other words, in order to win, a team must score exactly 15 points, but not more.
