

PSWS 2023 Transportation RFI Log

Updated March 1, 2023

Question from UCI:

Are the project boundaries restricted to Nordhoff Street (anything within the right of way and the adjacent area)?

Answered March 1, 2023

Project boundaries are Nordhoff Street. Additional work in adjacent areas may be proposed at this stage in the design with proper justification.

Question from UCI:

Is there an existing georeferenced ROW map that we could be provided with? We have obtained the parcel map of the area but the lines were scaled up and we would like to confirm the boundaries.

Answered March 1, 2023

A parcel/right-of-way (ROW) AutoCAD file has been uploaded to the same link as the aerial imagery, as provided in the rules.

Question from UCI:

Are we able to relocate the bus stops? Is the client looking for upgrades in the bus stops themselves or any aesthetic upgrades for the bus shelters?

Answered March 1, 2023

Consultant should evaluate bus stop locations and provide placements and solutions to best improve bus service along the Nordhoff Street corridor.
