Notes: 1. Overall Rank is based on Weighted Total Points. The highest rank correlates to the lowest summation of weighted points.
2. Weighted total points were calculated by applying the weight scale percentage and assigned 1 per individual competition rank. Example: 1st Place Ranking = 0.10*15 (or 10%) in Concrete Canoe. 15th Place Ranking = 0.10*15 (or 150%) in Concrete Canoe.
3. Total points is NON-WEIGHTED (simple) summation of points earned in each competition.
4. Weight Scale is the percentage that this particular competition contributed to the overall Symposium score.
5. Points for Steel Bridge were based on an interpolation scale of the final cost. 100 points are assigned to the lowest cost and 1 point is assigned to the highest cost bridge. This only includes bridges that were ranked.
6. 17 total universities participate in the 2023 ASCE Southeast Student Symposium.
